

## Quick hanger 4-pointed

**Quick hanger 4-pointed** is a metal suspension element designed for plasterboard construction. A pair of rivets connects the product body which is made of hot-pressed steel galvanized sheet metal with clamping spring. The shape of the head allows easy insertion and mounting into the CD profile.

### Use

It is used for fixing the suspended ceilings from CD profiles to the supporting ceiling structure.

A pair of holes in the spring is meant for inserting the wire with the eye or hook.

The required reduction is achieved by suitably selected wire length.

The special shape of the hangers head allows boosting strength and bearing capacity.

| Product name           | Packing (pcs) | Pcs in carton | Pcs on pallet | Material                | Coating EN 10327             | Load-bearing capacity DIN 18168-2 | Reaction to fire | Corrosion protection | Hazardous substances |
