

Quick hanger for T-profile

Quick hanger for T profile is a metal element designed for mineral suspended ceilings construction. A pair of rivets connects the body made by pressing of hot-dip galvanized sheet steel and a single spring clip.

The slit in head of the element is intended for connection to the T profile.

Use

It is used for anchoring the main T profiles of the mineral ceiling to the bearing ceiling structure.

A pair of holes in the spring is designed for insert the wire with the eye or hook.

Desired reduction is achieved by a suitably selected wire length.

Product name	Packing (pcs)	Pcs in carton	Pcs on pallet	Material	Coating EN 10327	Load-bearing capacity DIN 18168-2	Reaction to fire	Corrosion protection	Hazardous substances
Quick hanger for T-profile	100	-	10200	DK51, spring EN C67S+LC	min. Z100, spring Delta tone	0,15 kN	A1	B	NPD

The product should be stored in a dry, thermally stable and tempered environment to prevent moisture condensation on the product surface.
